PROFESSIONAL SUMMARY

Final-year IT Engineer (CGPA 8.60/10) with hands-on experience building and deploying full-stack web applications and AI-powered embedded systems. Proficient in React.js, Node.js, Express.js, and MongoDB, with demonstrated impact across fintech and EdTech domains. Delivered 2 production-grade internships and multiple real-world projects integrating REST APIs, cloud deployment, and ML pipelines. Strong foundation in data structures and scalable system design.

TECHNICAL SKILLS

Frontend:	HTML, CSS, JavaScript, React.js, Bootstrap
Backend:	Node.js, Express.js, REST APIs
Databases:	MongoDB, MySQL, MongoDB Atlas
AI/ML:	YOLOv8, TensorFlow, OpenCV, Sensor Fusion, Python, Scikit-learn, Pandas, NumPy, Matplotlib, CNN
Languages:	C++, Python
Tools:	Git, GitHub, Docker, Tableau, Jupyter
Deployment:	MongoDB Atlas, Render (Basics)

EXPERIENCE

Software Developer Intern | Vias MoboTech

Jan 2025 – Mar 2025

- Developed 10+ responsive web pages and integrated RESTful APIs, reducing average page response time by ~30% through optimized API calls and efficient state management
- Collaborated across 5-member team using Git for version control, maintaining clean commit history with zero merge conflicts over 3-month engagement
- Implemented UI components using React.js aligned with design specifications, improving cross-browser compatibility across Chrome, Firefox, and Safari

LMS Developer Intern | Stellar International

Jan 2025 – Mar 2025

- Customized Moodle LMS for 200+ active learners, adding 4+ new learning features including progress tracking and course analytics
- Improved platform usability by redesigning course management workflows, reducing instructor setup time by ~25%
- Integrated custom plugins and optimized backend configurations to support concurrent user load

PROJECTS

Agentic AI-Based Suspension & Geometric Control System

2025

Stack: YOLOv8 · OpenCV · LiDAR · ESP32 · Roboflow · MATLAB · CARLA

- Trained YOLOv8 on custom Roboflow dataset achieving 91%+ pothole/speed-breaker detection accuracy; fused LiDAR + camera for <5cm distance estimation
- Integrated ESP32 actuator control with <200ms response latency; validated full system in MATLAB and CARLA simulation environments

Alumni Association Web Application

2025

Stack: Node.js · Express.js · MongoDB · REST APIs

- Developed full-stack alumni platform with job portal, mentorship system, and member directory; built 15+ CRUD API endpoints with JWT-secured auth
- Designed MongoDB schema for alumni profiles, job listings, and mentorship records, optimizing query performance with indexed fields

Gym Management System

2025

Stack: Node.js · Express.js · MongoDB Atlas · REST APIs · Render **Live:**

<https://gym-website-ql24.onrender.com>

- Built and deployed full-stack gym app supporting 3 membership tiers, session booking, and user registration; integrated MongoDB Atlas for cloud persistence

EDUCATION

B.E. in Information Technology

PVG's College of Engineering and Technology, Pune

CGPA: 8.60 / 10.0

2022 – Present

Relevant Coursework: DSA · Deep Learning · DBMS · Software Engineering · Computer Networks · OOP · Operating Systems

ACHIEVEMENTS & CERTIFICATIONS

- PICT Impetus and Concepts 2026 — Competed in national-level technical event, presenting a working AI-based system prototype under pressure
- Deployed a production full-stack applications with live users, demonstrating end-to-end ownership from development to cloud deployment
- Secured Global Rank **4568** in TCS CodeVita Season 13, demonstrating strong competitive programming and problem-solving skills.
